Welcome to ScanConference

The conference, that will take place in Oslo in August 2004, is the first of its kind in Oslo. ScanConference can offer you as a participant keynote speakers like Bill Hume from IBM Lotus Notes, Bob Balaban from LooseLeaf and many other well known capacities from the US, UK, Germany, Denmark, Sweden and Norway. New names will be entered as they sign up as speakers.

In the beautiful surroundings of the capital of Norway, between the seaside and the historic fortress, ScanConference will provide you with the latest within Notes/Domino and WebSphere, for both administrators as developers, as well as users and leaders within the IT-business.

You may still register - even after the conference has opened!

It is **not** too late to register and you may even have a Drop-In admission pass.

Call / SMS: +47 93620708 / +47 95204090

Last minute offer: Drop-In admission pass

Gives you the opportunity to attend the sessions you prefer
NOK 1250,-

Sponsored by:

More than 60 sessions!

Keynote speakers:

Kevin Cavanaugh is Vice President of Development for Lotus' Messaging products. In this position, Cavanaugh has engineering responsibility for the company's brands Notes, Domino, and Domino Everywhere. He has also managed the company's Advanced Collaboration product development teams and the international product development organization with development centers in Dublin, Tokyo, Beijing, Seoul, Taipei and Singapore

Bob Balaban a professional software developer in the Boston area for more than 25 years. Bob will have two sessions at the conference, and he will also do a Workshop Extra on August 25th.

Gary Devendorf, Microsoft. For more that 7 years, Gary Devendorf was the Product Manager for LotusScript, Domino Designer, Domino Objects, XML, Java, Web Services and more.

Terje Osmundesen, from Mandagmorgen.no will be a Keynote speaker at the conference. Mr. Terje Osmundesen is a widely used speaker, lecturer and commentator. He has published several books and articles on future topics and trends.

Uffe Sorensen, Lotus Technology Group Executive. Uffe is the business unit executive leading the geography-wide community of I/T Specialists and Sales Engineers, who work with customers, partners, and alliances on IBM Lotus software for Portal, on-demand Workplace, and Collaboration.

Photo: SS Christiania

*Monday evening there is a
boattrip and dinner onboard.*

Steve Pepper is the founder and Chief Executive Officer of Ontopia. Steve represents Norway on the ISO committee SC34 and is convenor of SC34/WG3, which is responsible for the Topic Maps standards. Steve will present a Keynote at ScanConference 2004 on the subject of "Seamless Knowledge".

Donald Page Symbian UK, has worked for Symbian since 2000. During this time he was Symbian's representative on the board of directors of SyncML and oversaw its transition into OMA. He has responsibility for PC connectivity, synchronisation and device management within Symbian.

Please do not hesitate to contact us on e-mail:
post@scanconference.no if you have any questions or
comments. You can register by using e-mail:
register@scanconference.no.

Conference hotel - Location and Travel

The conference is located near the harbour in downtown Oslo. (See map at page bottom) This is a beautiful recreation and shopping area called Aker Brygge, only a five to ten minutes walk from the National Theatre railway station.

The conference hotel is Vika Atrium, where the conference will take place.

Vika Atrium Conference Hotel

Address: Munkedamsveien 45, 0250 Oslo, Norway
Telephone: +47 22 83 33 00
Telefax: +47 22 83 09 57
E-mail: vika.atrimum@rainbow-hotels.no

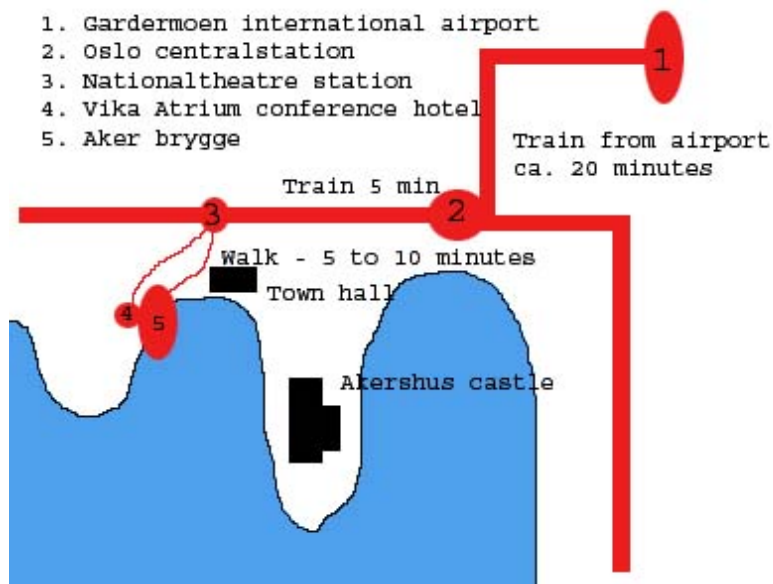

Aker Brygge

The conference is located near the harbour of downtown Oslo. This is a beautiful recreation and shopping area called Aker Brygge.

Here you can find many restaurants, pubs, bars, night-clubs and shops.

Maps

There is only a short train ride from Gardermoen International Airport **-directly-** to the National Theatre station . This station is just a few minuts walk from the City Hall, Aker Brygge by the seaside, ferries and more.

Close to both of these are - on the West side of Aker Brygge - the conference hotel, Vika Atrium. From beginning to the end of your travel from Gardermoen - there is only a total of thirty to fourty minuts. Though it is a nice walk - seeing the Akershus fortress, the Oslo fjord and more - and it might take you some more time - considering the view.

More information about travel in Oslo ...

ScanConference 2004 highlights

- IBM Lotus Software News August 2004
- The future of Notes and Domino
- WebSphere Programming
- XML with Steve Pepper, convenor WG3
- PDA - Security, Applications, Synchronisation
- JavaScript / LotusScript - Programming
- Domino Administration
- Jumpstart sessions, two hours, C++ with Daniel Nashed
- Jumpstart sessions, two hours, XML with Bob Balaban
- Notes and Domino- Best Practices, Programming and Administration
- Workshop Extra with Bob Balaban
- IBM Lotus software and Microsoft products
- Boat Roundtrip the Oslofjord
- --- and much more

Photo: SS Christiania, Monday evening there is a boatrip and dinner onboard.

Welcome to ScanConference 2004

The Scandinavian countries are early adopters of technology, such as information systems, handheld computers and groupware solutions for planning, co-ordination and reporting. In this respect, the Scandinavian countries have plenty of large organizations, developers and consultants where software products from IBM Lotus Software are central.

Up to now, Scandinavian developers, consultants, CIOs, sophisticated users and others with an interest in Lotus Notes, Domino, WebSphere and groupware in general, had to travel to places like Orlando, San Francisco, London and Berlin in order to learn about the latest trends, listens to some of the worlds leading capacities within this field or see how technology and knowledge are combined in "best practices". ScanConference want to provide what requested by the Scandinavian groupware community - a world class conference in Scandinavia, where Oslo is chosen.

ScanConference´s ambitions are to offer eye-opening insight, cogent strategies, up-to-the-minute solutions, and advanced technologies you need as an IT professional. You will hear about the very latest industry and business trends from world-renowned visionaries and IBM executives. Get an insider's look at upcoming Lotus products, services and solution from the people that are developing them.

The ScanConference program magazine ensures that you know about every topic available for you to pursue from the conference in 2004. It provides details on more that 60 conference sessions - from the most detailed development tips and techniques, via the broadest global perspectives to JumpStart sessions. In regards to Birds-of-a-Feather sessions, ScanConference will follow the example of other conferences, and offer you a chance to speak up and share ideas, issues and strategies with capacities like Bob Balaban and Gery Davendorf.

Outside the conference facility, we hope that the participants at ScanConference will find the boat trip at the Oslo fjord relaxing and enjoyable, as well as an opportunity to expanding your network and horizon.

Make the most out of ScanConference 2004.

ScanConference Administration.

Kevin Cavanaugh is Vice President of Development for Lotus' Messaging products.

In this position, Cavanaugh has engineering responsibility for the company's brands Notes, Domino, and Domino Everyplace. He has also managed the company's Advanced Collaboration product development teams and the international product development organization with development centers in Dublin, Tokyo, Beijing, Seoul, Taipei and Singapore

Previously, Cavanaugh served as director of Xyvision, Inc.'s marketing division and developed and executed a strategy which moved the company from turnkey business into an open software company. Prior to his work at Xyvision, Cavanaugh held the position of Division Manager at Applicon Japan where he defined pricing strategies and set up the hardware and software organization.

Cavanaugh's experience in the Far East also includes management positions as a consulting engineer and manager for Distributor Operations where he developed and supported new distributors in Korea, Taiwan and Hong Kong.

Cavanaugh graduated from Yale University with a bachelor's degree in arts and received a master's degree in architecture from the Massachusetts Institute of Technology (MIT) in Cambridge, MA.

Bob Balaban a professional software developer in the Boston area for more than 25 years, Bob spent over 10 years at Lotus Development Corp. and Iris Associates, most recently as Iris Team Leader responsible for the LotusScript and Java versions of the Notes Object Interface, and for Notes Agents. He was architect for the Version Manager component of 123/W, invented the LotusScript Extension (LSX) architecture, and authored the Notes "back-end" classes. Bob left Iris in October, 1997 to form Looseleaf Software, Inc., a contract development and consulting firm. He is also co-founder (along with Karen Hobert, of Top Dog Training & Development) of Dogwood Software, LLC, which offers several Domino add-on products.

**Uffe Sorensen, Lotus Technology Group Executive
IBM Software Group - Europe, Middle-East and Africa**

Uffe is the business unit executive leading the geography-wide community of I/T Specialists and Sales Engineers, who work with customers, partners, and alliances on IBM Lotus software for Portal, on-demand Workplace, and Collaboration.

Uffe has held various management positions in the IBM Software Group since it's inception, and joined the Lotus organization in 1996 after IBM's acquisition of Lotus Development Corporation. Initially, Uffe drove Lotus' positioning to open standards and the Internet. In 1999, Uffe was leading Lotus' messaging and wireless activities in the region and was in 2000 named Chief Technology Officer for Lotus software in EMEA. After the integration of Lotus Development with the IBM Software Group, Uffe was named Technology Group Executive for Lotus software in EMEA.

Before joining Lotus, Uffe worked 25 years for IBM in various technical and managerial positions in both development, marketing and sales - including authoring and publishing several SW product offerings for IBM. Uffe has maintained a strong focus on software for human

interaction and collaboration since joining IBM in 1970.

Uffe is a 1976 graduate from the Danish Technical University as Master of Science in high power electrical engineering. Currently, Uffe lives in Copenhagen with Jannie (his wife) and Tosca & Mario (their cats) - yes, Jannie & Uffe are avid opera fans...

George Chiesa is the Founder and CTO of dotNSF Inc. (<http://dotNSF.com>), an IBM Business Partner that provides award winning tools, customized solutions and services in the areas of design, deployment and management of Business Critical Infrastructures, High Availability/ Clustering and Security (including Enterprise / custom Single Sign On solutions). George has a degree in Business Administration (plus an MBA-by-nite from SDA Bocconi University), several IBM Certifications in as many brands/areas, and 14 years of experience with Notes, 10 of which deploying Lotus Development's "own" internal and extranet Domino server farms in EMEA). He is a regular speaker in the "Best Practices" tracks of IBM Lotusphere / Symposium and other international events, and has published several articles and recently participated as co-author of the "Lotus Security Best Practices Redbook (SG24-7017)". Giorgio speaks several languages, but his preferred skill is encapsulating crypto-techno-speak into business value - in practical layman terms.

Daniel Nashed - founder and principal of Nash!Com - Communication Systems - is a Notes/Domino administrator, consultant and developer mainly focused on infrastructure, high availability and security solutions. Working with Notes since V3, Daniel provides consulting and solutions design for Domino administration, system integration and troubleshooting. Daniel is also an expert in multi-platform C-API development for NT, UNIX and Linux. He is a recognized industry expert, and regularly shares his expertise as a writer for the German "Groupware Magazin" and as a regular speaker at conferences. Nash!Com is a proud member of the Penumbra Group (<http://www.penumbra.org>), a consortium companies pooling their resources and management skills to create the ideal collaborative technology provider network.

Prof. Dr. Ludwig Nastansky is regarded as one of the first Notes users and developers in Europe starting with Lotus Notes Rel.-1. He is Professor of Business Computing and Director of the Groupware Competence Center at the University of Paderborn, Germany. He has founded two companies centering on services and products with focus on the people, collaboration and process management in modern enterprise solutions. He is chairman of the supervisory board of Pavone AG. His current research and project activities are centered around technology oriented collaborative EAI-environments and exploit the Lotus technology. The current focus is limited to the five following areas of technology: N/D-based core services collaborative e-Business, J2EE/ Websphere integrated portal environments, human workflow within business process management, integrated process and project control in collaborative solutions, people driven knowledge management applications.

Gary Devendorf, Microsoft. For more that 7 years, Gary Devendorf was the Product Manager for LotusScript, Domino Designer, Domino Objects, XML, COM toolkit, Domino Collaboration Objects, Java, Web Services and more. He is a very popular speaker who has published articles and given more technical presentations than anyone at Lotus. After be down sized by IBM, Gary now works for Microsoft as a Technical Evangelist for collaboration. Gary has a unique perspective on collaboration and champions integration of Notes/Domino and .Net products.

Jim Moffat, heads up Smith-Ivanson Ltd, a new company whose mission is to shrink the world and accelerate business through real-time collaboration. He has been involved in the sale and marketing of team collaboration software since 1985. Until recently, Mr Moffat spent 12 years in Lotus and IBM in collaborative software and middleware, product and brand marketing.

Karen Hobert, Top Dog. Renowned for developing applications on Domino and the World Wide Web, Karen's skill in creating web user interface designs for networked applications has attracted many notable clients including Lotus Development, IBM, Intel, Ernst & Young, the US Navy and many others.

Ms. Hobert, uses her 13 plus years of network application design to create internet and intranet applications using Lotus Domino as a back-end system. Karen is one of the first technologist to be certified by Lotus Development as both Certified Lotus Instructor Level II (CLI II) and Lotus Certified Lotus Professional (CLP). Karen has written numerous articles and courses on this technology.

Erling Hesselberg

Erling Hesselberg is employed by Item Consulting / Item Education in Oslo - as a consultant and programmer. Item is an IBM Business partner. Erling has during the last nine years been working with sophisticated Lotus Notes / Domino solutions in major projects for different companies in Scandinavia. His programming skills are of high level in Lotus Script, Notes formula language, JavaScript, XML and HTML.

Erling is certified as principal and instructor in different certifications classes, both as administrator and developer in Lotus Software. Erling is also certified as instructor for other IBM partners and customers in Lotus Software products.

Lars Beck, founder, consultant and developer at Atensis AB an IBM Business Partner in Sweden. As a IBM certified solution advisor Lars focus is mainly working with prestudies and project management. Lars has worked with Domino development since version 4 with a special focus on content management systems. One of Lars other passions for the moment is Open Source projects.

Steve Pepper is the founder and Chief Executive Officer of Ontopia, a company that provides topic map software, consulting, and trainingservices. Steve represents Norway on JTC1/SC34, the ISO committee responsible for the development of SGML and related standards, and is convenor of WG3 (Information Association), whose responsibilities include the HyTime and Topic Map standards. He is the editor of the XML Topic Map specification (XTM) and the author of numerous papers and presentations on topic map-related subjects, including the well-known "TAO of Topic Maps". A frequent speaker at SGML, XML, and knowledge management events around the world, Steve was for many years the author and maintainer of the "Whirlwind Guide to SGML and XML tools". He also co-authored (with Charles Goldfarb and Chet Ensign) the "SGML Buyer's Guide" (Prentice-Hall, 1998).

Terje Osmundsen, Mr. Terje Osmundsen is a widely used speaker, lecturer and commentator. He has published several books and articles on future topics and trends. Mr. Osmundsen is educated within public science, with additional studies within economy, sociology and law from the US.

Mr. Osmundsen has a wide experience from politics, and has held positions as president of Young Conservatives, political advisor for the Prime Minister - Mr. Kåre Willoch. He has been employed by various enterprises, as within marketing with Saga Petroleum, strategic planning with Alcatel's head office in Paris, industrial politics and internationalisation with Confederation of Norwegian Business and Industry as well as heading the strategic business unit for environmental and water treatment with Kværner.

In 1997, Mr. Osmundsen joined publishing group Universitetsforlaget as CEO. In 1999 he founded Preview, a constancy with focus on future topics and trends. In 2003 he founded the weekly publication Mandag Morgen, where he serves as publisher and CEO.

Mr. Osmundsen has been on the board of directors with enterprises like EITele Group

(chairman), Telenor International as well as with several start-ups. He has chaired the international research foundation Cicero and has been on the board with Henie Onstad Art Centre and with the Norwegian European Movement.

Mr. Osmundsen is probably best known for his work within future scenarios. He took the initiative and was the general manager of a major future research study within BI Norwegian School of Management - "Scenarier 2000". This research really introduced scenario planning for a broader group in Norway and was the worlds first scenario project on national level.

Lars Marius Garshol is currently Development Manager at Ontopia, a leading topic map software vendor. He has been active in the XML and topic map communities as a speaker, consultant, open source developer, and technology creator for a number of years. He helped develop the standard SAX API for development and translated it to Python, and wrote an open-source validating XML parser in Python.

Lars Marius has also been responsible for adding Unicode support to the Opera web browser. His book on Definitive XML Application Development, was published by Prentice-Hall in its Charles Goldfarb series. Lars Marius is one of the editors of the ISO Topic Map Query Language standard, and also co-editor of the Topic Map data model. He also chairs the OASIS GeoLang TC.

Simon Peek is the technical consultant for Teamstudio Europe Limited, he has worked in IT, in the areas of quality assurance and technical support, for 15 years.

During the last five years with Teamstudio he has worked in technical support and has recently taken on a more strategic role being responsible for market analysis, as well as delivering technical product training to the technical support and sales teams. He also delivers technical presentations at trade shows and user group meetings, as well as product presentations and technical workshops at client sites.

Florian Lier, Managing Director smartiX consulting gmbh, started collaborating with Lotus Domino in 1995 at the University of Hohenheim. Since then this passion became his obsession and resulted in the foundation of smartiX consulting gmbh (<http://www.smartix.de>) in 1999, an IT-consulting company with the pure focus on Lotus Domino-technologies, especially Lotus Workflow and mobile connections to Lotus Notes applications.

The strategy of smartiX is to transfer the high-end technologies and know-how into sustainable and suitable applications for the SMB-market. Florian Lier has passed 8 different PCLP-certifications in the area of AD and SA. smartiX is also proud member of the Penumbra Group (for further details see Daniel Nashed) and co-founder of Bundled Know-How (<http://www.b-kh.de>), a business-partner association in Germany.

Erik Bakken, A-Vision and ITF

CV for Stein Bagger, CEO – ITF / CO-EX

Stein is the CEO of ITF and has been working as a business analyst for approx. 5 years and has been CEO for software companies for the last 7 years, including ITF. Stein has 2 bachelor degrees; one in Corporate Finance and one in Accounting and holds an MBA and PhD in International Business.

Stein has played a major part in the strategic and commercial decisions behind the making of CO-EX.

Arjen Moermans is Systems Engineer for Bowstreet in Europe, a US based provider of J2EE and Portlet development tools. He studied Computer Sciences at the Technical University in Delft in the Netherlands.

Before he joined Bowstreet in 2000 he spent time working at Compuware (4GL application development tools), Informix (database and data warehouse software), Netscape (Internet software) and Stellent (content management software). In his current role he worked on a variety of projects, including high profile implementations in the finance, manufacturing and travel industries.

Donald Page, Symbian UK. Donald Page has worked for Symbian since 2000. During this time he was Symbian's representative on the board of directors of SyncML and oversaw its transition into OMA. He has responsibility for PC connectivity, synchronisation and device management within Symbian.

Prior to working at Symbian, Donald has worked for a variety of technology companies including SCO, Unisys and HP. He has degrees in Computer Science and Applied Economics.

Speaker Halvor Kalve

Halvor Kalve is founder of ITA AS, an IBM premier Business Partner focusing on Lotus Software and Websphere solutions since 1995. Mr. Kalve is Certified Lotus Instructor specializing in Document Management, active as CRM Solution Advisor, developer and coach in Lotus Collaboration projects for various decentralized and global customers. ITA will enter its 10th years anniversary in 2005 as a Lotus consulting company.

Speaker Rita Elton

Rita Elton is a Principal developer from ITA AS, an IBM premier Business Partner focusing on Lotus Software and Websphere solutions since 1995. Ms Elton is a IBM Advanced Principal Developer with extensive experience with advanced integration projects. Her experience range from SAP to Document Manager integration to the TeleCatalog application, updating and synchronizing PAXB, SAP and Notes Directories.

Speaker Andre Brunsæl

Andre Brusæl is a principal developer from ITA AS, an IBM premier Business Partner focusing on Lotus Software and Websphere solutions since 1995. Andre has 4 years education from Department of Informatics at University in Oslo and is certified Java programmer. During the last years, Brunsæl has been developing customized solution for Domino and Document Manager using Java and XML.

Rune Carlsen, BAR Consult AS. Rune Carlsen is currently employed by The Norwegian Public Health Service, working as a Senior Consultant programmer and architect. Rune has previously worked for ConCrea IBM and during his years in IBM he was used in large projects both in Norway, Denmark, France, and lately Greece, where he was part of a team responsible for architecting systems for the Olympics in Athens 2004.

Rune is also the co-author of the IBM Redbook "Domino 6: A Developer's Handbook", which was written in 2003, in Boston USA. Rune is a Principal CLP application developer as well as a system administrator and has also worked as an instructor for Lotus/IBM for several years.

Darren Hitchcock is a member of Percussion Software and has worked with the full Power Tools product range for 3 years. The range consists of ServerAdmin Plus, a comprehensive, enterprise strength Administration tool, PowerFlow, which enables any business workflow process to be automated in a graphical workbench and Notrix and Lyrix, which facilitate data and content integration outside of Domino respectively. Darren has spearheaded the products at shows globally including Lotusphere, Admin & Developer and DNUG for the last 3 years.

Bob Balaban will do a workshop with WebSphere programming and advanced LotusScript Programming. This workshop requires an additional fee. See registration form for prices.

SC Home	Start	End	Workshop Extra on August 25th, 2004	Location
Location	07:00	08:55	Early Bird Breakfast Gathering	Vika Atrium hotel resturant (Upstairs)
Highlights				
Speakers	08:55	09:00	ScanConference administrative information	Vika
Agenda Day One				
Agenda Day Two	09:00	10:30	<u>Advanced Coding Techniques for Domino in J2EE</u> Domino can be made to integrate well with J2EE servlets and JSPs as a back-end data store and service module. You can store your documents there and take advantage of the power of Domino views, full-text indexing and messaging from a primarily J2EE environment. But you have to be careful how you do it! This session will explore the differences between using the local and remote ("CORBA") Java APIs for Domino, tell you what some of the problems are and how to code around them.	Vika
Workshop Extra				
Registration				
General Terms				
Data Protection				
Sponsors				
Exhibitors	10:45	11:45	<u>Custom Single Sign-On Architectures and Techniques</u> All Domino developers know how great Domino security is. Unfortunately, we sometimes need to integrate Domino Web authentication with other platforms, which may not have as good a security infrastructure as we're used to. With "blended" applications (part of the app living in Domino and part somewhere else) becoming more and more common, users are demanding more and more sophisticated "single sign-on" solutions -- not only do users hate logging in multiple times, the solution has to be robust and secure. This session explores the Domino DSAPI plug-in architecture and describes how it can be used to implement custom authentication, special SSO and other solutions for Domino and other platforms. We'll talk about the special needs of smart card authentication, lock-out requirements, and cross platform authentication.	Vika

ScanConference 2004

[Notes / Domino / Groupware / PDA]

SC 2004
August 23 - 25th.

General Terms and Conditions

General terms and conditions for the booking of seminars, courses and conferences

[SC Home](#)

1. Terms of Application

The following General Terms and Conditions shall govern the contractual relationship between the participants in seminars, courses and conferences (the "event") and ScanConference. In the event of there being a discrepancy between the general terms and conditions at ScanConference and the terms and conditions at the participant's company, the terms and conditions in this document will be assumed to be correct.

[Location](#)

[Highlights](#)

[Speakers](#)

[Agenda Day One](#)

[Agenda Day Two](#)

[Workshop Extra](#)

2. Registration/Confirmation of Registration

Your registration may be submitted by internet, per post, fax, e-Mail or by telephone. Your registration shall become legally binding upon receipt of our written confirmation.

[Registration](#)

3. Benefit

The participation fee is quoted per person per event plus VAT. The participation fee includes conference material, lunch and beverages during the breaks. ScanConference reserves the right to substitute the announced speakers by a suitable replacement. The program may be subject to modifications that do not change the character or content of the event. If the cancellation of this event is necessary due to force majeure or any other compelling reason, the participants will be notified immediately. The participation fee shall be reimbursed. There is no contractual claim for refund of travel and hotel costs and non-productive time unless these costs can be proved to have arisen as a result of negligence by ScanConference. ScanConference commits itself to whatever is possible to solve or limit any failure that may possibly occur. ScanConference can up to May 1st 2004 cancel the conference as a result of an unsatisfactory number of registered participants. In this case the participants will be notified immediately and the participation fee will be reimbursed in full.

[General Terms](#)

[Data Protection](#)

[Sponsors](#)

[Exhibitors](#)

[Hotels](#)

[Press](#)

[SC Admin](#)

4. Maturity and Payment, Delay and Charging

The participation fee becomes payable within 14 days upon receipt of the invoice and prior to the event. If payment is delayed, ScanConference is authorised to charge an interest on late payments of 5% above the base rate per year. If ScanConference shall prove a higher damage caused by delay, the claim will be asserted. The participant is similarly authorised to prove that the delay was not avoidable or the amount lies significantly below the damage claimed by ScanConference. Payment can be made by credit card, bank transfer or by cheque. If the money is sent in the form of cash or cheques, ScanConference shall not be liable for any loss. The participant can only charge legally accepted claims or claims that were accepted in written form by ScanConference. The participant only has the right retention if the counterclaim is also based on the same contractual relationship.

[Printable version](#)

5. Cancellation

It is only possible to withdraw the registration in writing maximum 30 days prior to the event taking place for an administrative fee of €100.

If the participant withdraws from registration 14 days before the event takes place, the participant will be charged with 50% of the participation fee. Failure to attend or a cancellation within 14 days of the event taking place, the participant is obliged to pay the full amount of the fee. ScanConference accepts the participation of a person who acts as a substitute for the participant registered originally. In this case, a fee for the change of registration of €50 will become due. ScanConference will accept an amendment to the registration if the participant decides to participate in another event ScanConference offer or if the participant decides to send another person to act as a

substitute for him. ScanConference will charge the participant with a service fee of €50 if the participant decides to change to another event. It is only possible to change the event once. An additional charge of €50 will be made if the participant changes the registration later than 48 hours before the event starts. That amount of money will not be charged if the participant changes the registration due to reasons evoked by ScanConference themselves. As a basic principle, the participant has the right to prove that no loss at all incurred due to the cancellation or that the loss is significantly lower than the cancellation fee withheld by ScanConference.

6. Copyright

All conference documents are copyrighted. Only written permission obtained from ScanConference enables data to be copied, circulated or used otherwise.

7. Liability

The events will be prepared and executed out in a diligent manner by qualified authors and speakers. ScanConference will assume no liability for the topicality, accuracy and sufficiency of the conference documents and the perceived success of the event.

8. Applicable Law, Court of Jurisdiction and Place of Fulfilment

The applicable law is the Norwegian law, excluding the United Nations Convention on Contracts for the International Sale of Goods (CISG). As far as legally possible, the court of jurisdiction and the place of fulfilment have to be in Oslo.

9. Right of Withdrawal

You are guaranteed the right to withdraw from your registration within 14 days after receipt of the registration confirmation without indicating a reason. The withdrawal is to be submitted in written form. In this case, no cancellation fees become due. It is sufficient to send the withdrawal to the following address to comply with the terms:

ScanConference, Oslo, Norway

This right of withdrawal is not given if the booked event has already take place and the participant attended the event.

10. Booking of Accommodation

We will inform you about the exact location of the event in the confirmation. For participants who need a room, we have reserved a limited number of rooms for the participants in 3 different hotels at favourable rates. Please contact the hotel(s) stated in the confirmation as soon as possible to book a room.

realize your full potential

CO-EX Portlet Factory is the markets most advanced tool to migrate or convert Domino- and Enterprise applications to WebSphere and Workplace.

CO-EX Portlet Factory have pre-built and ready-to-use Connectors, which means that you easily can portalize any:

Lotus Notes/Domino based application

Enterprise application: SAP, JD Edwards, PeopleSoft & Siebel

Application based on: DB2, MS SQL, Oracle & Sybase

With CO-EX Portlet Factory developers no longer need advanced levels of developer skills in Java and J2EE in order to create, customize and deploy portlets - CO-EX Portlet Factory automatically generates all the complex Java code. Many routine tasks have been automated and once the portlets have been built, customization, maintenance and deployment of portals becomes much easier.

With CO-EX you can protect your investments in - as well extend the life of - Enterprise & Notes/Domino applications by leveraging them as new web and portal based applications.

The benefits are:

Increased Developer Efficiency

Lowering your operational costs

Increasing you ROI

smartiX consulting gmbh

The strategy of smartiX is to transfer the high-end technologies and know-how into sustainable and suitable applications for the SMB-market. Florian Lier has passed 8 different PCLP- certifications in the area of AD and SA. smartiX is also proud member of the Penumbra Group (for further details see Daniel Nashed) and co-founder of Bundled Know-How (<http://www.b-kh.de>), a business-partner association in Germany.

The Company : ITA

ITA offers a unique combination of professional management consultants and IT software development specialists. Our services assist you to create, develop and maintain best practice within Document Management and Customer Relationship Management e-solutions for top companies.

Our goal is to take your business vision and transform it into reality in months not years. We provide the highest level of value-added service to deliver a rapid ROI. It's for this reason that our clients come back to us year after year.

ITA Overview:

9 years software development experience
Business process software solutions
Market leading packaged software applications
Custom-made software development services
IBM Premier Software Partner
AA rating at Dun &Bradstreet

Why ITA makes a difference:

Proven, innovative business process software
Rapid delivery and payback, low risk
Cross-functional implementation teams
Global project management experience
Responsive, flexible and customer focused
International client base and references

BAR Consult AS

BAR Consult AS, a consultancy company with years of experience in Lotus Notes/ Domino, system administration, architecture, advisory and application development. BAR Consult has expert skills and qualifications, which reflects BAR Consult's field of technology. BAR Consult delivers consultancy services to companies, and has specialized in advisory, architecture and application development.

BAR Consult AS mainly base their services and solutions on technologies from IBM/ Lotus, but also have great experience and knowledge within technologies from Microsoft and Citrix. BAR Consult guarantee services of good quality, based on years of experience and top certified employees. BAR Consult form a personal relationship between the consultant and your company, which works toward a common combined action.

Looseleaf.net , Bob Balaban

Looseleaf Software Incorporated was founded in September, 1997 by Bob Balaban, a 10-year veteran of Lotus Development Corp. and Notes subsidiary Iris Associates.

Looseleaf™ contract development, consulting and training services are provided to users of Lotus Domino, the world's premier groupware platform, IBM WebSphere, and now also to user's of Groove.

Percussion software has a strong history of providing solutions that enhance productivity and lower costs for all types of organisations. By combining our industry expertise with flexible products and dedicated services, Percussion provides practical software solutions that enjoy an unparalleled level of customer satisfaction.

Thousands of organisations have invested heavily in Lotus Domino and have built Domino applications to manage and store their mission-critical information. Today many organisations are adopting heterogeneous environments that rely on other platforms.

Our Tools for Lotus Domino enable customers to seamlessly bridge these platforms, ensuring flexible content reuse whilst preserving context and meaning. Percussion's range of award-winning and innovative Power Tools include; Lyrix for content integration; PowerFlow and Notrix for development and ServerAdmin Plus for administration.

Press Information

ScanConference is an international IT conference, arranged in Oslo on August 23rd and 24th, 2004. ScanConference will focus on Lotus Notes, Domino, GroupWare and hand hold solutions (PDA). The conference will be conducted in English and have international capacities from the US, Great Britain, Germany and Scandinavia as presenters.

Information regarding ScanConference can be found at www.scanconference.no. A separate "press section" will be added to this web site in the near future. ScanConference is naturally interested in answering questions or giving interviews.

Press contact: Mr. Tony Bugge. Phone: +47 93 62 07 08. E-mail: press@scanconference.no

Representatives from the press, with a valid authorisation, will be given free access by applying for such in advance.

Yours sincerely,
 Tony Bugge
